

PRODUCT INSTRUCTIONS

Inline Folding Coupling

FORMUFIT Inline Folding PVC Couplings connect two segments of PVC pipe externally, and folds over itself. To connect this product to PVC pipe, follow the instructions shown below.

Assembly

 <p>1</p>	 <p>2</p>
<p>Align a segment of PVC pipe into one socket of the folding elbow assembly.</p>	<p>Press fully into place. Secure with PVC cement or screws if desired.</p>
 <p>3</p>	 <p>4</p>
<p>Connect a second segment of PVC Pipe to the second socket on the Folding Coupling.</p>	<p>Bend and fold as needed for the position of your project.</p>

Adjustment and Use

The folding elbow does not maintain a specific position and is either open or closed. For gravity-supported folding applications, it is recommended that the hinge of the folding elbow facing up, or at the top of the fold. This will allow you to fold items up when not in use, but still be able to bear weight in the down position.

Securing

For permanent and strong connections, it is recommended to use PVC cement/solvent to attach the PVC pipe and the folding adapter. You can also use screws to temporarily connect the pipe and coupler together.
